

Preassembled breathing circuit set for HAMILTON-C1/T1/MR1

Single use, for adult and pediatric patients

- Coaxial circuit (available in four different lengths)
- Proximal flow sensor and elbow adapters
- Expiratory valve set (optional)

Your benefits at a glance

- ✓ Improved safety due to prior assembly and single use
- ✓ Greater time and cost efficiency as reprocessing is eliminated
- ✓ One-handed operation promotes a seamless clinical workflow
- ✓ Optimal positioning on the side of the unit (no kinks in the circuit)
- ✓ Circuit close to the ventilator (less risk of circuit damage)
- ✓ Coaxial design provides the largest possible heat exchange area to help warm the inspiratory flow

Preassembled breathing circuit set for HAMILTON-C1/T1/MR1

Intelligent connection with elbow adapters
