

# Preassembled breathing circuit set for HAMILTON-G5/S1

Single use, for adult and pediatric patients

- Coaxial circuit in the lengths 180 cm/71 in and 240 cm/94 in
- Proximal flow sensor and expandable expiratory tube
- Expiratory valve set (optional)

## Your benefits at a glance

- ✓ Improved safety due to prior assembly and single use
- ✓ Greater time and cost efficiency as reprocessing is eliminated
- ✓ One-handed operation promotes a seamless clinical workflow
- ✓ Optimal positioning thanks to expandable expiratory tube
- ✓ Coaxial design provides the largest possible heat exchange area to help warm inspiratory airflow

Preassembled breathing circuit set for HAMILTON-G5/S1

Intelligent connection with expandable expiratory tube
