

Fiber Holder FlexPen 2.0

Ergonomic, safe, flexible!

Fiber Holder FlexPen 2.0

Ergonomic, safe, flexible!

The new fiber holder FlexPen 2.0 from KLS Martin combines ergonomics, easy handling, and flexible use in one instrument.

FlexPen 2.0 is a modular system for the guidance and fixation of a laser fiber or a waveguide and is comprised of a handle, a Tuohy-Borst adapter, and various attachments with bending mandrel.

Maximum ergonomics

Due to its grip-friendly design and ribs the instrument is extremely ergonomic to hold optimally so it allows comfortable work.

Many different functions

The Luer lock attachment makes it possible to connect irrigation or suction tubes. Smoke plume evacuation is also possible via the special clip-on tube.

Easy handling and reprocessing

The Tuohy-Borst adapter, which fixates the fiber securely and firmly, is disposed of after use – so there are no more small, barely accessible parts that can get lost during disassembly or reprocessing!

Flexible use options:

Not only do the different attachments make it possible to use the instrument in various disciplines and indications - all the available fiber diameters are easy to insert and fixate.
