

Stem Cells Mesotherapy

PROMOBARREL

medical device

The new simple and safe
system for the
non-enzymatic withdrawal
and separation of stem
cells from adipose tissue

OIL

ADIPOSE TISSUE

PHYSIOLOGICAL SOLUTION /
BLOOD CELLS / ANESTHETIC

STEM AND STROMAL CELLS

X2 ZOOM

the KIT contains:
1 Syringe of 20 ml
1 Screw rod
3 Luer Lock adapters

*"Stem cells are the direct
precursors of the cells found
in the different dermal layers
and different tissue."*

The innovation: The adipose tissue not only for filling but also for a regeneration purpose, using stem and stromal cells.

MESOSTEM regeneration technique, the new methodology for:

- regenerating facial tissues
- regenerating the scalp
- treating scars
- rejuvenating the vulvar area

Easy and safe procedure:

Just a few grams of fat tissue extracted with a thin cannula through a small incision of about 2 mm, using the exclusive Promobarrel medical device to obtain the bio tissue necessary to isolate, select and use own adult stem cells.
