# Portrait™

## Intracranial, Head & Neck Device

The lightweight Portrait™ Intracranial, Head and Neck Device provides superior immobilization for a variety of brain, head and neck radiotherapy treatments.

### Features:

- Easy to use
- Lightweight
- Daily reproducibility

*Updated MR safe design enables use with INSIGHT™ MR Body Coil Holder & Elekta® HexaPOD™ in addition to other imaging and treatment modalities.*

The Portrait™ Intracranial, Head & Neck Device and Portrait™ S-frame Thermoplastic Masks enable radiotherapy treatment with confidence, providing a high level of stability by limiting patient motion and reducing the probability of positioning errors.

The cantilevered device indexes to the couch top with a two pin Locating Bar or can utilize Direct Indexing™ Adapter for increased reproducibility and stability. The Portrait™ accommodates supine and prone setups for patient specific treatments. The Portrait™ is rigid while providing minimal attenuation, making it ideal for full 360-degree treatments. The Portrait™ MR Intracranial, Head and Neck Device is MR Safe, Radiolucent and treatment ready.

*Hand Grip Array™ on Portrait™ Intracranial, Head & Neck Device aids in reproducing the position of the patient's shoulders.*

## Flexibility to Perform SRS Treatments with Portrait™ & S-Type Devices

The SRS Adapter is a non-invasive solution that enables sub-millimetric positioning for stereotactic radiosurgery treatments on the Portrait™ and S-type devices. The system reduces motion, allowing for maximum dose to the tumor while minimizing radiation delivered to the surrounding healthy tissue.

### Clinical Advantages:

- Enables treatment of SRS and multiple lesions with a single isocenter when combined with Encompass™ SRS Fibreplast® Masks
- Accommodates a variety of SRS headrests and cushion supports for a fully customizable setup
- Easy to setup and can help to minimize procedure time and cost.
